## Religious Stances Bibliography

As of now, this document is a stub. I got tired, and a major tragedy struck my family just as I finished the main text and sat down to do the bibliography. It takes a lot of work to make a bibliography. Whether the bibliography gets done depends on whether anyone wants it. Email me if you are desperate:

In the meantime, if you want to read, read the books by Max Weber. Each major religion gets a book. Each book is only about 200 pages long. Although dated, these books are still the single best works on each major religion, and still well worth reading. Then, no kidding, read the items from the series "Idiot's Guide", "For Dummies", "Made Simple", and "Very Short Introduction" on the major religions and whatever related topics seem interesting. You can get quick lists off the Internet.

Thanks for your patience.
