(BC) "Butler / Cunningham". "BC" refers to a position for research and teaching, on agriculture and the environment, in the College of Agriculture of Auburn University in Auburn, Alabama. Claude Boyd held the position from about 2002 to about 2011. For his term, he, Wayne Shell, June burns, and I organized a series of national conferences on topics related to agriculture and the environment. As part of the position and the conferences, I made a website. I count the website as papers and a project. I wrote reports for the website based on my own research. A few are included here. Power Points are intended to be stand-alone to appear on the website, like a report. Items were revised after original appearance date shown below.

(BC) "Butler / Cunningham". "BC" refers to a series of three conferences and a website for an endowed position for research on agriculture and the environment, from 2002 to 2006. I made the website, which I count as a paper. My contributions to the site were reports based on research. A few are included here. Power Points are intended to be stand-alone to appear on the website, like a report. Items were revised after original appearance date shown below.
